REALITY REDEFINED

EMPOWERING LAW ENFORCEMENT THROUGH VIRTUAL REALITY

Welcome to Convergence LE/MIL, the forefront of cutting-edge stress inoculation training for law enforcement. We take pride in revolutionizing the way officers prepare for high-pressure situations with our groundbreaking virtual reality (VR) technology. Our immersive training platform offers a true-to-life experience, allowing law enforcement personnel to navigate challenging scenarios in a safe and controlled environment. By simulating real-life encounters, officers develop crucial decision-making skills, emotional resilience, and tactical expertise, ensuring they are well-prepared to handle the complexities of their profession.

Tactical expertise

CONVERGENCE AI

LAW ENFORCEMENT TRAINING WITH AI-POWERED INNOVATION

Introducing Convergence AI, the most advanced artificial intelligence for law enforcement training ever created. With Convergence AI, officers now have access to a groundbreaking interactive experience like never before.

THIS STATE-OF-THE-ART AI COMPANION is designed to replicate real-world scenarios, adapt to individual officer responses, and provide personalized feedback, ensuring a dynamic and tailored training experience for each user. Convergence AI's advanced capabilities enable officers to enhance their decision-making skills, communication and emotional resilience while facing high-pressure situations in a safe virtual environment.

This revolution of technology has allowed Convergence LE/MIL to offer not only the highest quality VR stress inoculation training ever created, but also the highest quantity of dynamic scenarios ever offered in a single package.

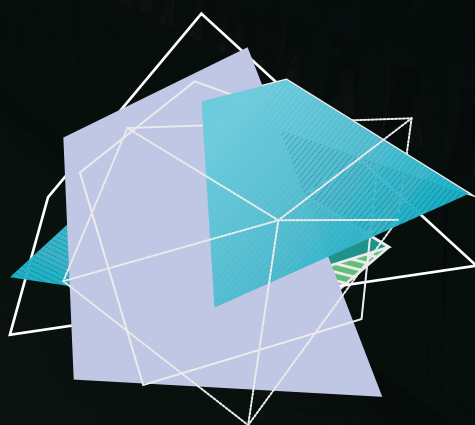

REAL TIME PERFORMANCE TRACKING

KNOW EXACTLY WHERE EACH OFFICER STANDS with the integration of real time precision performance data tracking technology.

With this advanced system, law enforcement officers can now receive comprehensive feedback and analysis on their performance during each simulation.

The data tracking feature monitors crucial aspects of an officer's response, including decision-making speed, full array accuracy breakdown, civilian casualties, response time to subdue subjects, and comparable historical scenarios. This valuable data empowers officers to identify areas for improvement, refine their skills, and excel in high-pressure scenarios. Our artificial intelligence, Convergence AI, also tracks this data and will change its dynamics to focus on needed areas of improvement for each officer.

TRAINING OPTIONS

At Convergence LE/MIL, we are committed to making our training tools accessible to law enforcement departments of all sizes. We understand the significance of ensuring that even small law enforcement agencies have access to top-notch training resources.

Our mission is to empower officers with the necessary skills and expertise, regardless of budget constraints. Through strategic partnerships and streamlined technology, we have developed a cost-effective solution that allows even the smallest law enforcement departments to benefit from our immersive virtual reality training platform.

At Convergence LE/MIL, we firmly believe that every officer deserves the best tools to excel in their profession, and we are proud to offer our training at a price that ensures no department is left behind in their pursuit of excellence.

CONVERGENCE SYSTEM PURCHASE

ENJOY THE FREEDOM and convenience of training whenever, and wherever your department chooses with the most advanced, and more importantly, most affordable stress inoculation training ever offered, period. We have built the most compact form factor simulators capable of operating in a small room to a massive warehouse. Just plug it in, power it on, and train. Our team of setup professionals can train a single officer in one day to run the Convergence LE/MIL simulator. We also provide 24/7 remote support for any crucial updates or maintenance on system hardware.

BASE PRICE

\$50,000

Includes a Convergence LE/MIL simulator with all required hardware and software licenses.

UPGRADES

Additional simulator (up to 8 total users in one simulation):
\$50,000/simulator

Note: Greater than 4 users requires a LAN Hardware Upgrade
LAN Hardware Upgrade: \$4,000
